Wet & Dry Vacuum Cleaners

Part No: **ISSA629MSUB**

Performance	
Power	230 Volts, 50Hz
Watts	2400, 2 x 1200 Watt motors
Air flow	420m³/h
Waterlift	2470mm
Max capacity	80 Litre
Dimensions	700D x 570W x 930H mm
Weight	28 Kg

General	
Motor	2x two stage heavy-duty bypass motors
Tank	Heavy-duty chromed steel
Trolley	Heavy duty tipping
Suction hose	2.5m x 38mm hose
Accessories	38mm Ø
Standard tools	Wet use only
Power cable	10m with plug

230 Volts | **2400 Watts** | **80 Litre** | **38mm Hose**

Standard Tools

Product Information

The “Sub” Heavy-Duty Wet Vacuum Cleaner is equipped with an internal 550W submersible pump, allowing operators to conveniently empty the tank into a drain or soakaway while vacuuming. This feature makes it especially suitable for cleaning areas that have recently been washed down or flooded.

The unit is not recommended for dry applications and the manufacturer advises a maximum suction hose length of 10m to maintain optimal functionality and performance.

New High Efficiency Motors - June ‘25

From June 2025, the 230V ISSA629MSUB wet & dry vacuum cleaner comes fitted with a new high efficiency performance motor in place of the traditional dual-stage motor.

To help identification, updated units are blue in colour rather than red. Red, legacy units using the traditional motor (see Alternative Products) cannot be fitted with this new motor as the vacuum head internals are different. Only replace like-for-like motors. Call our Sales Team for advice.
