Product Information

New High Efficiency Motors - May '25

From May 2025, the 230V PY515 wet & dry vacuum cleaner comes fitted with a new high efficiency performance motor in place of the traditional dual-stage motor.

To help identification, updated units are blue in colour rather than red. Red, legacy units using the traditional motor (see Alternative Products) cannot be fitted with this new motor as the vacuum head internals are different. Only replace like-for-like motors. Call our Sales Team for advice.
