

TECHNICAL DATA SHEET - LUBRICANTS

QUALUBE VACUUM PUMP OIL ISO 100

DESCRIPTION

Qualube Vacuum Pump Oil ISO 100 is a high-quality lubricant specifically formulated for use in vacuum pump systems. This oil is designed to meet the stringent requirements of vacuum applications, providing excellent performance, stability, and protection for your equipment.

Qualube Vacuum Pump Oil ISO 100 additionally incorporates a red dye for easy identification and determining levels through a sight glass.

APPLICATIONS

Qualube Vacuum Pump Oil ISO 100 plays a crucial role in the proper functioning and maintenance of vacuum pump systems. Its primary purpose is to lubricate, seal, and cool the moving parts within the pump, ensuring efficient operation and extending the lifespan of the equipment.

BENEFITS

ISO 100 Grade: Qualube Vacuum Pump Oil ISO 100 adheres to the ISO 100 viscosity grade, ensuring optimal lubrication properties and performance in a wide range of vacuum pump systems.

Low Vapor Pressure: The low vapor pressure of Qualube Vacuum Pump Oil ISO 100 helps to maintain a consistent vacuum level, reducing the risk of oil carryover into the vacuum system and ensuring efficient pump operation.

Compatibility: Qualube Vacuum Pump Oil ISO 100 is compatible with a variety of vacuum pump types, making it a versatile choice for different vacuum applications.

SIZES

This product is available in the following sizes:
1Ltr | 5Ltr | 25Ltr | 200Ltr | 1000Ltr | Bulk

STORAGE

Do not store in direct sunlight
