Output : 3.5 kW (4.7 ps)

L70N
Output : 4.9 kW (6.7 ps)

L100N
Output : 7.4 kW (10.0 ps)

Call for Yanmar solutions

Exceeding Power and Environmental Expectations.

Designed with Yanmar's proprietary direct injection technology, maximum combustion efficiency is realized through the ideal match between the combustion chamber and injection system. This means a powerful, but environmentally friendly engine.

L100N

Compact, Direct injection Engine = Easy installation & Low Fuel Consumption

Keeping with the tradition of compact design, the new L-N series are simple to install. It fits in cramped spaces without sacrificing power and performance. Yanmar's proprietary direct injection technology allows the engine to sip rather than gorge on fuel. This means lower running cost in the world of rising fuel prices.

Low Vibration and Low Noise

Superior vibration and noise reduction is achieved through the use of precision balancers.This leads to operating comfort even under long work hours.

Quick and Easy Start

Starting is a breeze with the standard recoil starter. Starter motor and switch are also available as an option.

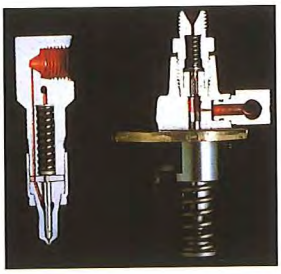

AIR COOLED DIESEL ENGINE

L-N series

L48N 3.5kW(4.7hp)
L70N 4.9kW(6.7hp)
L100N 7.4kW(10.0hp)

The total FIE expertise only a complete diesel maker can provide.

Yanmar developed the miniaturized fuel injection system, one of the world's smallest. We have since raised it to a level of efficiency that ensures you maximum power from every drop of diesel. Its extraordinarily low fuel consumption is a result of this super-precise FIE and its direct injection system — the first ever to go into this type of engine.

L70N

L48N

A little engine built to stand up to hard work.

The design, structure and materials of the L-N combine to form a rugged, hard working machine. With tough but lightweight alloys used for main engine parts, an extra tough crankshaft and an overall simplified structure the L-N is a compact package of power.

Fast, effortless starts from a one-pull recoil starter.

A short and smooth pull of the toggle kicks off the engine, as simple as a gasoline model. It is made easy by a special auto-return decompressor and Yanmar's own efficient combustion system. Electric starting is also a useful option.
